

v1.0

FX Elements Creator*

80+ FX in 01 Pack

Pack Installation
Instructions

Pack Installation

NOTE: First download and install FX Prism plugin into your Photoshop, get it [here](#).

This installation method is for both **Windows** and **Mac OS** users, you can install **The Package** automatically by **FX Elements Creator.jsx** file, you can find it inside the downloaded folder. open **FX Prism Plugin** from **Window >> Extensions >> FX Prism** and follow those steps to install it successfully:

1. If you don't have any installed package, you'll see an empty space where you can click to install a new package. if you already have an installed package, click on the "**Install a new pack**" button from the menu bottom the preview image.

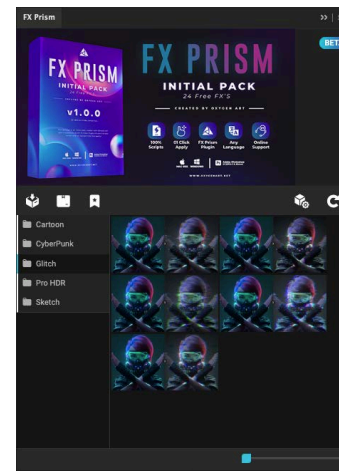

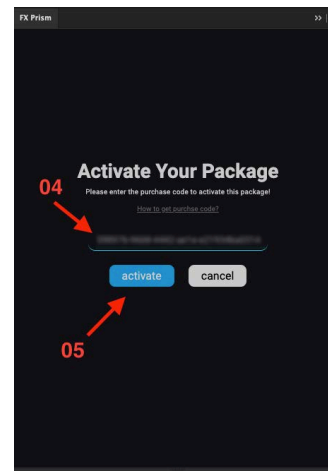

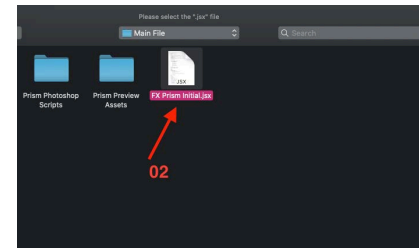

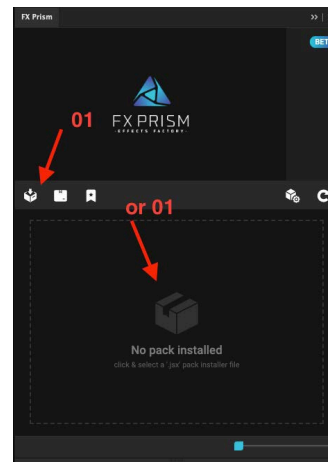

2. Load the **FX Elements Creator.jsx** file from the downloaded folder.

PLEASE NOTE: every installer has the same name of the package so make sure to do not change its name, otherwise the installation will failed because of that.

3. The plugin will ask for a **purchase code** Here's your: **envato-element-user**
This purchase code works only for the Envato Elements Subscribers!

If you have any problem in the pack activation phase, please contact us immediately.

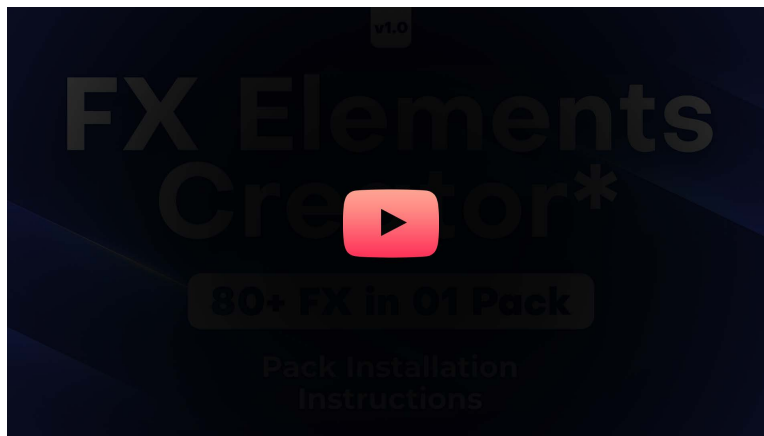

This pack is made with love by **OXYGEN ART** team.

Some links

For a better user experience, we made a video tutorial on how to install the FX Elements Creator pack. you'll find the video tutorial of how to use each FX from the pack in the PDF instructions of the FX'S.
