Instructions

# Introduction

Hello There!

Thanks for purchasing this package that contains a multi professional Effects. to use this package, you need to install ***FX Prism*** plugin, the first world Photoshop plugin that will help you to generate FX's easily and in 01 click, the plugin is for free.

This pack contains **80 FX's in 08 different categories:**

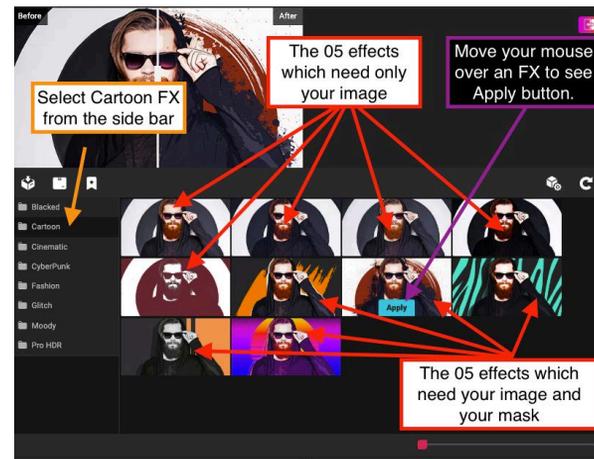

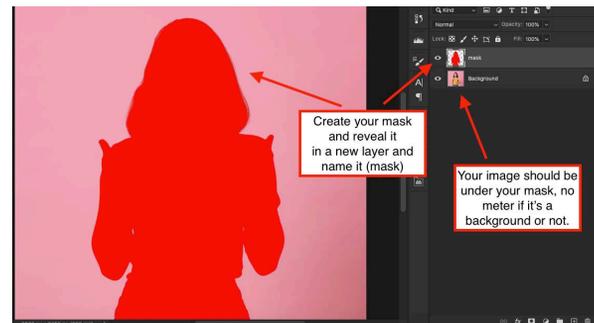

- 10 Cartoon FX.
- 10 Glitch FX.
- 10 Cyberpunk FX.
- 10 Pro HDR FX.
- 10 Fashion FX
- 10 Moody FX.
- 10 Cinematic FX.
- 10 Blacked FX.

We made a detailed pages that will explain everything you need to know about those Effects.

# Image & Mask Method.

This method is for **Cartoon Effect Only**.

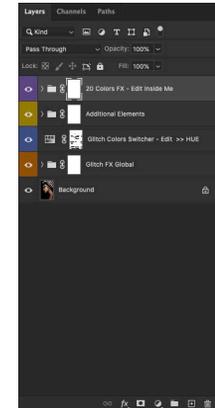

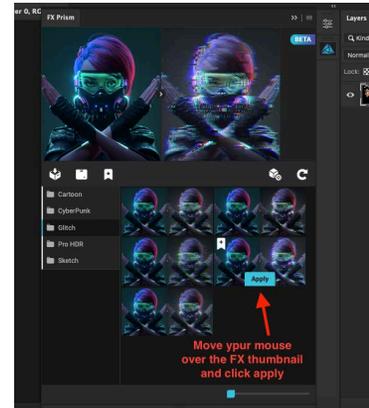

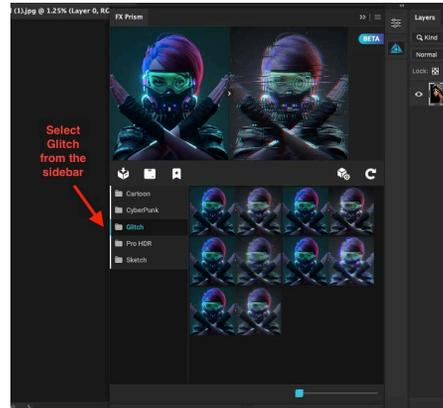

- this effect has 05 effects need your image only and 05 others need your image and your mask, so make sure you've only 01 layer inside your layers panel for the first 05 effects and 02 layers inside your layers panel for the second 05 effects.
- Open your image and create a mask layer of your object with any select tool, name this layer "**mask**" with lowercase (**Important**) .
- For better result make sure your minimum image width or height is 3000px.
- Open **FX Prism plugin**, and select **FX Elements Creator** if you have more packages, in the left menu select **Cartoon**, then move your mouse over 01 of the FX's and you'll see Apply button, click on it and wait a few seconds until the process ends
- Edit your final result as you wish, you've 20 additional colors FX, and tone correctors and backgrounds... so edit yours until you got the best output.

# Image Only Method.

This method is for the following effects (**Glitch - Fashion - Moody - Cinematic - Blacked - CyberPunk - Pro HDR**).

- All effects need only your image, so make sure you've only 01 image inside your layers panel.
- For better result make sure your minimum image width or height is 3000px.
- Open **FX Prism plugin**, and select **FX Elements Creator** if you have more packages, in the left menu select **The FX that you want to apply**, then move your mouse over 01 of the FX's and you'll see **Apply** button, click on it and wait a few seconds until the process ends
- Edit your final result as you wish, Done!

# Contact us

Our mission is to help you save your time, and we mean that even if you contact us our support team is here to help you in the work hours (10am - 19pm GTM+1).

To make our team help you perfectly make sure you've describe your issue correctly and if that possible to send a screenshot of your issue.

If you can send also a screenshot of your panel layers when you get a problem throw the FX Applying process that will help to understand the source of the problem.
